

MLR 6: Three Reads

First Read

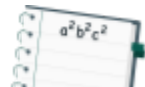

- Summarize the scenario without using any numbers or values.
- Create a sketch, if possible.
- Define the problem without using values.

Second Read

- What are the given values and unknown values?
* *Include units or meaning in your answer.*
- What is the question(s) being asked?

Third Read

- What strategy or process do you need to use to answer the question?
- What hints does the problem give to help you know how to solve it?
