

MLR 5: Co-Craft Questions

write. Record the given	scenario or displayed information in the space below.
Think: What mathemat	ical questions can you ask given this information?
*Use this snace to record	our "rough draft" thinking.

Share: Discuss your questions with your classmates. Are your questions similar?

- Record questions shared with you below.
- Discuss the questions and revise them based on the conversation.
- Choose the question(s) you think best. Be prepared to share your chosen question(s) with the class.

Think: What ideas did you get from the class discussion? *Use this space to record your "rough draft" thinking.	
Revise: What does the class decide is the best mathematical question for this scenario? Is this different from the question you originally chose?	
Record: Write the given mathematical question for the scenario.	
C a ² b ² c ²	
Reflect: How does your chosen question(s) compare with the given mathematical question? Do they use the same information? Are they focused on the same variable(s)?
